Argentina (Remote)

Professional Summary

Computer Engineer with 15 years of experience in analysis, design, and development of solutions mainly focused on process management and optimization within organizations.

Throughout my career, I have participated in the full project lifecycle, from functional definition to implementation and continuous improvement, combining technical expertise with business understanding.

Currently working as a backend developer, with experience in collaborative environments and technical decision-making. Seeking remote opportunities where I can contribute experience, commitment, and growth in dynamic environments.

Professional Experience

Full Stack Developer — BairesDev · Contract · Remote — Oct 2021 - Present

- Design and development of RESTful APIs.
- Development and maintenance of applications based on Clean Architecture.
- Integration with external services (third-party APIs).
- Contributed to the gradual migration of selected backend services from Django to FastAPI as part of an application modernization initiative.
- Endpoint protection.
- Contributed to frontend development using React, mainly implementing forms and simple user interfaces.
- Development of unit and integration tests.
- Implementation of authentication and authorization mechanisms.
- Performance optimization and query tuning.

Technologies: Python, FastApi, React, JavaScript, SQL, Unit Test, Integration Test, Docker

Backend Developer — Ministry of Education · On-site — Nov 2012 - Sep 2021

- Developed and maintained web applications for large-scale educational information systems, participating in projects related to student administration, human resources, and document management.
- Designed and implemented business features using C#, .NET Framework, SQL Server, and Dapper, contributing to process automation and data management.
- Developed web solutions using ASP, JavaScript, and Bootstrap for internal administrative systems.
- Participated in the migration of selected legacy applications from VB and Classic ASP to C# ASP.NET Core during the later stages of the modernization program.
- Served as a technical reference, contributing to system maintenance, continuous improvement, and reporting solutions with Crystal Reports.

Technologies: C#, .NET, Dapper, ASP, JavaScript, Bootstrap, SQL Server
